

Outdoor Maths Day – May 2019

Chelmondiston Primary School

In May 2019, the school took part in an Outdoor Maths Day organised by the Maths Subject Leaders of the St Edmundsbury and Ipswich Diocesan MAT.

Melissa Class used natural materials to help them with their times tables.

Edith May measured the perimeter of leaves and converted the measurements.

Thistle class made Venn and Carroll diagrams.

Edme looked at patterns in nature. They went outside to gather natural materials with patterns and then made their own patterns with natural resources.

Feedback from the day:

- Pupils enjoyed learning outdoors
- Pupils used natural resources as manipulatives
- It allowed creativity and opportunities for problem solving
- Teachers have spoken about putting more outdoor learning into their maths lessons

- Natural resources were used to support learning across the maths curriculum
