Maths Through The Movies

On Monday, Toy Story 4 was introduced to EYFS and KS1 through a short trailer. The children were immediately excited to carry out maths activities related to this film. After the introduction to their movie, the children completed some math tasks. EYFS found out which set of toys had the most toys, Year 1 and 2 solved addition number sentences related to Sporky and measured how far Duke Caboon jumped (multilink for Year 1 and cm for Year 2). On Wednesday, the children enjoyed having their parents in school for a Maths Hunt. The children followed clues which lead them to a maths question which they needed to solve!

You found Mr Potato Head!

Reception - Grab some books, do you have more or less than your adult friend?

Year 1 - Mr potato head was reading 12 books but he decided to put 3 back. How many books is he reading now?

Year 2 - Mr potato head was reading 20 books but he decided to put 2 back. How many books is he reading now?

Ice age dawn of the dinosaurs was introduced to KS2 on Monday. The children worked in small groups to find out some information about a specific dinosaur. The facts included their mass, speed, power, life span and length. They even measured out the length of some dinosaurs on our school field to put it into perspective! In preparation for parents joining the children in school, each class prepared a word problem for their parents to solve! The children loved being able to share their questions to their parents. The parents seemed to enjoy the challenge too!

We ended the week by watching our movie and then each class shared their favourite part of maths through movies week during celebration assembly.
