

## Mellis Church of England Primary School

### gains Silver 'Eco-Mark'

The School benefits from having one of its Recently Qualified Teachers being into geography in general, and 'green' issues in particular. In order to give the children of the School more opportunities to explore this vital issue further, Miss Frost set up a School Eco-club. This well attended and supported club has been active promoting awareness of conservation issues, including 'light switchoffs', plastic usage, pollution outside the school from idling cars and the recycling of batteries.

We're really pleased to note that in recognition of these efforts the School has been awarded the Silver Eco-Mark! Well done to Miss Frost and her Green Crew!
