

Morland Church of England Primary School Outdoor Maths Day

On a lovely sunny day in May the whole school focussed on Maths for the entire day. Many of the activities took place outside in the school grounds and most of the Maths curriculum was covered.

The children in EYFS and KS1 focussed on exploring numbers in the environment. They also explored shapes and measures. They had great fun measuring and weighing pine cones and comparing their findings.

In KS2 the children worked on problem solving and open-ended investigations covering a range of mathematical areas of learning, including, data handling, measurement, estimation, symmetry and the mean, mode and median.

The children from right across the school had a fabulous fun filled day of learning and discovered why having good mathematical skills is so important in all aspects of life and in all environments.
