

# SPROUGHTON C of E PRIMARY SCHOOL

*Let your light shine - MATTHEW 5:16*

## Science Day

*Winners of BBC Dragon's Den 'Sublime Science Workshop' certainly brought some awe and wonder to Sproughton C of E Primary School. Each class had their own exciting session of hands on science learning. The children explored chemical reactions by completing a 'sweet' investigation and made their own sherbet. They also*

*discovered polymers through slime making! They were extremely excited when designing their slime and couldn't wait to show their family at the end of the school day. A highlight of the day was catching smoke rings during the spectacular science session! We also learnt about pressure, air and forces by watching demonstrations involving bubbles, smoke and flying objects.*

*The day finished with a bang in an assembly of science 'magic' tricks and spectacular experiments. The children's mouths fell wide open with amazement! We saw fire tricks, elephants toothpaste and so much more, whilst learning the science behind it. Thank you Sublime Science for providing us with a day to remember.'*
