

Maths in Nature

Summer Term 2019

Here are some Year 4 children who have been challenged to find the perimeter of the playground. It was important that they were accurate as our Headteacher is interested in buying a new Astro Turf.

Children in Years 4 and 5 spent a morning focusing on patterns in nature. They took photographs on the iPads of patterns that they spotted. Then they made natural pictures in groups.

Year 2 focused on making natural repeating patterns using natural objects. They worked in teams and here is one of the beautiful end results.

Year 2 children also used the items that they had collected to create giant tally charts. Here you can see how many sticks, stones and leaves that one group collected.
